

**CRP Clinic****FERTILITY PRICE LIST**

The Centre for Reproductive, Immunology & Pregnancy (CRP) has collaborated with King's Fertility to offer patients the best possible chance of achieving a pregnancy. The partnership between the two centres will marry the ethos of the CRP & Kings Fertility to put our patients first and operate as pioneers in the world of fertility and reproductive immunology.

This price list provides information about our treatments, investigations and package prices as a Satellite Clinic. Payment will need to be made before treatment commences.

TREATMENT COSTS

All **Treatment Packages** exclude medication costs, pre-treatment blood tests, ICSI or pICSI, counselling, embryo freezing & freezing of surplus embryos. All packages will be payable in full in advance of starting any treatment cycle.

NB - IVF may be changed to ICSI as late as the day of egg collection. The difference in cost will be charged accordingly.

In-vitro Fertilisation (IVF) £4,500

In your IVF cycle you will receive a dedicated consultant, delivering your bespoke care with the support of a senior patient IVF advisor throughout the week and on-call out of hours support. The package includes basic cycle cost of monitoring scans, advanced monitoring with blood tests as required, clinical advice, egg collection, sedation by consultant anaesthetist, fresh embryo transfer, advanced embryology (time-lapse closed culture incubation, embryo glue, blastocyst culture where appropriate), HFEA Fee, early pregnancy scan or follow-up consultation within 3 months of cycle. If we recommend for you to freeze all your embryos, the first transfer is discounted at a cost of £400.

If freezing and storage of Embryos is required, this is charged separately by Kings Fertility.

IVF with Intracytoplasmic Sperm Injection (ICSI) £5,500

In your ICSI cycle you will receive a dedicated consultant, delivering your bespoke care with the support of a senior patient IVF advisor throughout the week and on-call out of hours support. An ICSI cycle includes basic cycle cost of monitoring scans, advanced monitoring with blood tests as required, clinical advice, egg collection, plus micro injection of sperm, fresh embryo transfer, advanced embryology (time-lapse closed culture incubation, embryo glue, blastocyst culture where appropriate), HFEA Fee, early pregnancy scan or follow-up consultation within 3 months of cycle. If we recommend for you to freeze all your embryos, the first transfer is discounted at a cost of £400.

If freezing and storage of Embryos is required, this is charged separately by Kings Fertility.

CRP Clinic
